

ARUN KUMAR J

Python Full Stack Developer

victorarun32@gmail.com | 9342741283 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience building responsive web applications and REST APIs using Python, FastAPI, React.js, JavaScript, and SQL. Experienced in developing backend services, API integration, authentication, database operations, and frontend applications. Familiar with Docker, AWS cloud fundamentals, Git, Postman, and deployment workflows. Strong foundation in OOP, problem solving, and software development fundamentals.

EDUCATION

B.E–Computer Science engineering | Study World College of Engineering, Coimbatore
8.5 -May 2026

HSC | S.D.Eaden Matriculation Higher Secondary School, Cuddalore
85% -May 2022

SKILLS

Technical skills

Programming : JavaScript ,Python,SQL,HTML5,CSS3
Frontend : React.JS, Bootstrap ,Tailwind CSS3,Responsive Web Design
Backend : FastAPI , REST API Development ,API Integration, JWT
Database : MySQL, SQLAlchemy
Developer Tools : Git , GitHub, VS Code, Postman
Cloud & Devops: Docker,AWS (EC2,S3,IAM–Fundamentals)
Core Concepts: OOP, CRUD, HTTP/REST, DSA

Soft skills

- Quick learner & adaptable
- Strong problem-solving skills
- Passion for Full stack development
- Time Management

CERTIFICATIONS

Python Full Stack Development – Besant Technologies
Web based Technologies and Multimedia Applications – NPTEL

EXPERIENCE

Full stack developer– Intern

Besant technologies

- Built and enhanced responsive web applications using Python, HTML, CSS, JavaScript, and React.
- Collaborated in developing scalable backend functionalities and database operations.
- Applied full stack development practices to deliver efficient and user-focused solutions.

Frontend Developer – Intern

Viruzverse solutions

- Gained hands-on experience in website design and development using HTML, CSS, JavaScript, and modern frameworks.
- Assisted in developing responsive and user-friendly web pages for desktop and mobile devices.
- Developed knowledge of JavaScript, basic backend concepts, and databases, contributing to dynamic website features.

PROJECTS

Fraud Detection System | Python, FastAPI, React.js, MySQL, Docker | [Github](#)

- Developed a full-stack transaction monitoring application to identify potentially fraudulent transactions using machine-learning-based classification.
- Built REST APIs using FastAPI for transaction processing, prediction, validation, and database operations.
- Developed a responsive React.js dashboard for transaction monitoring and fraud-result visualization.

Movie Booking Web | React.js, JavaScript, HTML, CSS | [Github](#)

- Developed a responsive Movie booking web application using React.js with reusable components and structured UI design.
- Implemented dynamic features browsing, category-based navigation, and interactive user interfaces.
- Integrated API-based data handling and implemented responsive layouts using Bootstrap/Tailwind CSS.

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief .
